EDUCATION

SRM Institute of Science & Technology, Chennai **Sep 2021 - June 2025**
Bachelor of Technology (B.Tech)
Computer Science Engineering w/s Cybersecurity; GPA: 8.99

SKILLS SUMMARY

- Languages: C++, Python, SQL
- **700+** DSA problems solved on LeetCode (https://leetcode.com/jeetS07/)
- Backend**:** FastAPI, Django, RestAPI, Object-Oriented Programming (OOP)
- Frontend**:** React, HTML, CSS
- AI & LLM: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), LLM Integration, AI Agents, Prompt Engineering
- Database & Design: MySQL, PostgreSQL, Redis, Kafka
- DevOps: Docker, Nginx, Git, Linux

WORK EXPERIENCE

ServiceNow Developer Analyst | Deloitte Touche Tohmatsu India LLP **Jan 2026 - Present**

- Developed enterprise applications, dashboards and workflow automation solutions for business users. Implemented REST-based integrations.
- Automated backend solutions to improve operational efficiency and collaborated with stakeholders to gather requirements and deliver scalable software solutions.

ServiceNow Developer Intern | Deloitte Touche Tohmatsu India LLP **Jan 2025 - Jan 2026**

- Completed enterprise ServiceNow training focused on CSA and CAD concepts, including platform administration, scripting and application development.
- Contributed to ServiceNow portal and widget customizations through client-side and server-side scripting, and supported project and portal development for multiple Deloitte India ServiceNow customers.

PROJECTS

Redis from Scratch in C++ **Sept 2026 - Nov 2026**
https://github.com/JeetS07/Redis-from-scratch-in-Cpp

- Built my own in-memory Redis from scratch in C++, featuring TCP and RESP protocol handling, and concurrent client connections.
- Implemented thread-safe data operations, Redis-style commands, atomic operations, and efficient key expiration using lazy and background expiration and persistence mechanisms.

Production-Grade Distributed Food Delivery Platform (🔗 Demo Link) **May 2026 - Jun 2026**
https://github.com/JeetS07/Distributed-Food-Delivery-Platform

- Production-grade food delivery platform using Node.js, TypeScript, microservices, RabbitMQ, and segregated role-based services
- Implemented real-time order tracking, live rider location updates using Socket.IO, Razorpay & Stripe payments, file uploads, and Docker deployed containers on Render, RabbitMQ hosted in AWS EC2, with the frontend on Vercel.

Multi-Agent AI Research System with LangChain (🔗 Demo Link) **Jul 2026 - Aug 2026**
https://github.com/JeetS07/Multi-Agent-AI-Research-System-with-LangChain

- Built a Multi-Agent AI Research System using LangChain, GoogleGeminiApi, Tavily API, and BeautifulSoup, orchestrating Search, Reader, Writer, and Critic agents for automated research workflows.
- Engineered a shared-state agent pipeline with structured report generation, automated scoring and feedback, and a Streamlit interface for real-time AI research.
